

Amendments to the Claims

5. (Currently amended) ~~A~~ The moisture curable composition according to claim 1,
further comprising: produced by blending:

100 parts by weight of a mixture (A) comprising:

~~—— (1) a copolymer having reactive silicon groups which can be cross-linked by hydrolysis,
whose molecular chain has:~~

~~—— (i) alkylacrylate and/or alkylmethacrylate monomeric units having an alkyl group with 1
to 8 carbon atoms; and~~

~~—— (ii) alkylacrylate and/or alkylmethacrylate monomeric units having an alkyl group with 10
or more carbon atoms; and~~

~~—— (2) an oxyalkylene polymer including reactive silicon groups which can be cross-linked
by hydrolysis; and~~

~~—— 2 parts by weight to 300 parts by weight of amorphous polymeric powder and/or
amorphous silica (B) having a grain diameter ranging from 0.01 μm to 300 μm , wherein said
amorphous polymeric powder is poly(meth)acrylate powder. said mixture (A) has a first
refractive index, and a mixture of said polymethyl methacrylate powder (B) and said amorphous
silica has a second refractive index, and wherein a difference of the first and second refractive
indexes is 0.1 or less.~~

6. (Cancelled)

7. (Currently amended) ~~A~~ The moisture curable composition according to claim 5 ~~or~~
6, wherein said mixture (A) includes at least one polymer including silyl groups.

8. (Currently amended) ~~A~~ The moisture curable composition according to claim 7,
wherein said polymer is an acrylic polymer including silyl groups.

9-20. (Cancelled)
